FOR IMMEDIATE RELEASE

### **Rogers Group Proposes New Location in South Limestone County**

Rogers Group's Limestone County Quarry, currently located at 22917 Easter Ferry Road in Elkmont, Alabama, is planning to move its operation to the intersection of US Highway 31 and Laughmiller Road in south Limestone County. Pending approval, the new location would be fully operational within 18 months.

The new location, while further away from residential areas, will be better positioned to supply the growing demand for construction materials in north Alabama. In addition, the new location will offer improved access via US Highway 31, a four-lane highway, rather than the narrower county road currently used to access the quarry. This will provide a safer, more traffic-friendly way for haul trucks to deliver products to Rogers Group customers.

Additional jobs may become available at the quarry depending on increased business after the relocation.

Rogers Group has shown itself to be an excellent neighbor in Limestone County and recently received the prestigious Silver Excellence in Community Relations Award from the National Stone Sand & Gravel Association for its operation in Limestone County. The quarry regularly sponsors local school events and programs such as Boy Scouts of America and Housing for Humanity.
