FOR IMMEDIATE RELEASE

McEwen Lane Project Wins Acclaim, Awards for Rogers Group Inc.

Recently, the McEwen Lane/Interstate 65 interchange and bridge project was recognized with two design awards from separate organizations.

The Portland Cement Association (PCA) selected the bridge project as one of nine projects to win the association's Eleventh Biennial Bridge Awards Competition. The competition, instituted in 1988, recognizes excellence in design and construction of concrete bridges. [Click here](#) to read to story on PCA's Web site.

The Tennessee Concrete Association (TCA) gave the McEwen Lane project the 2008 Concrete Design Award in the Best Finishing: Commercial Decorative category. It was also named Grand Champion in the awards.

Rogers Group Division Vice President Rick Turner said, "We are proud to have been involved with this project. These awards serve as a tribute to all the hard work from our employees, the architects, our subcontractors, TDOT and local officials. We are very pleased with the project and know it will serve the driving public well."

The McEwen Lane project, designed by Gresham, Smith & Partners, was opened two months ahead of schedule in September 2007.

Rogers Group Inc., with headquarters in Nashville, Tennessee, employs approximately 1,500 people in five states. The growing 100-year-old construction products company provides crushed stone, sand and gravel, asphalt, highway construction and concrete masonry to the south-central United States.
